THE ONE

DISCOVER THE PERFECT SYNERGY OF EXCELLENCE

a curated selection of the finest products from leading brands, united in one catalogue to deliver unparalleled quality and innovation.

DiversiTech ®

2025

THE ONE-STOP-SHOP SOLUTION FOR HVAC-R PRODUCTS ➤

DiversiTech® Europe brings together leading European companies in the HVAC-R, fixing, and plumbing markets. Together, we provide an unmatched selection of components, making DiversiTech® Europe the one-stop-shop for quality, innovation, service, and comprehensive solutions to meet the sophisticated needs of international customers.

SIMPLIFY YOUR WORK

DIVERSITECH®

Founded in 1971, DiversiTech® Corporation is the leading manufacturer of HVAC/R components in North America, with a varied portfolio of more than 200 product categories. With a diversified offering that is constantly being improved and designed to meet the specific needs of HVAC/R professionals, DiversiTech® is distinguished by quality manufacturing and outstanding customer service.

Building on our robust manufacturing foundation, DiversiTech® is dedicated to enhancing the efficiency of our customers' workflows. Through the provision of a comprehensive system of accessories, we effectively remove the inefficiencies associated with procurement and supply chain management. This strategic integration of our products empowers our customers to operate smoothly and efficiently. Ultimately, this enables a sharper focus on delivering exceptional service and value to their clients, ensuring that quality and reliability remain at the forefront of their operations.

DEEP ROOTS
AND EXPERTISE IN MANUFACTURING

> **Precision, strength and sustainability**

We operate multiple state-of-the-art production plants across Europe, each excelling in distinct materials and manufacturing processes, reflecting our dedication to innovation, quality, and sustainability. Our plastics facilities are equipped with advanced injection molding machines, from 25T to 900T, alongside cutting-edge extrusion technologies, including mono and bi-extrusion capabilities. Operating 24/7, these facilities produce customizable PVC profiles designed to meet diverse client requirements, with enhancements such as UV protection.

Our steel die-making and tooling plants leverage advanced metalworking technologies to manufacture certified components that adhere to the industry's most stringent standards. Automated processes ensure efficiency, precision, and full traceability. Sustainability is at the core of our rubber production, where recycled car tires are transformed into durable black rubber anti-vibration solutions, reducing environmental impact while supporting the circular economy.

COMMITTED TO
EUROPEAN EXCELLENCE ›

Higher Product Quality

European manufacturing ensures exceptional quality, reliability and durability through some of the highest standards in the world.

Compliance with EU Regulations

Strict EU regulations guarantee safety, environmental responsibility, and energy efficiency, protecting buyers from legal risks.

Proximity to European Market

Shorter logistics chains ensure faster delivery, reduced costs, and a smaller carbon footprint in the supply chain.

Ethical Manufacturing Practices

Fair labor laws and ethical standards offer peace of mind, aligning supply chains with socially responsible values.

Focus on Sustainability

Localized production incorporates eco-conscious practices and materials, meeting the growing demand for sustainable solutions.

Local Reputation and Trust

The "Made in Europe" label signifies prestige, high quality, and reliability, strengthening confidence among customers and end-users.

CANALSPLIT® SYSTEM, THE SMART PLASTIC SOLUTIONS

Canalsplit® is our conduit born from an idea as simple as it is revolutionary and enthusiastically welcomed by installers. Ease of use and elegant design make this conduit the perfect ally for working less and better: this is why, almost 25 years after its conception, our conduit is still the most used by installers.

By choosing Canalsplit®, you will have the certainty of purchasing a product of the highest quality and 100% recyclable. You also have a complete customization service available such; the code, the label, the printing on the finished product, the color and the packaging.

ARE YOU INTERESTED? SCAN ME

Canalsplit® was born from a brilliant instinct to simplify installation. Combined with our ability to listen to our customers, this has transformed the product into an intelligent solution.

EU MADE IN   RoHS   UV RESISTANT   RECYCLE   REACH

Available sizes

Depending on installation configurations, ducts' contents may vary.

| 60x45 mm | 70x55 mm | 80x60 mm | 90x65 mm | 110x75 mm | 140x90 mm |
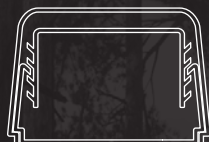

Technical data

Made of rigid, shockproof, UV-stabilized fire resistant PVC
High-quality performance, usable from -20°C / -4°F to +60°C / 140°F in a static position

Product features and benefits

Adjustable FASTBLOCK bracket, quick insertion for fixing pipes, removal by slightly retracting the walls.

Protective Film
Dirty hands while installing? No worries! Just remove the protective film from the ducts.

Wide selection of duct sizes
Choose among the 6 different duct sizes available for your professional installation!

Hide in beautiful view
Attractive design and special inserts that allow you to simplify and speed up installation: these are the keys to the success of the air conditioning conduits designed by Artiplastic.

CANALSPLIT®

Canalsplit®

Ease of use and elegant design make this conduit the perfect ally for working less and better: this is why, almost 25 years after its conception, is still the most used by installer. All sizes and colors are covered by protective film. 100% recyclable.

CANALSPLIT®

SPEEDIDUCT®
COVERS IT ALL,
FROM THE UNIT TO
THE WALL

Accessories such as the canalisation are made of rigid shock and U.V. resistant PVC.

Air conditioner and heat pump equipment do not operate properly when the lineset or the insulation gets damaged.

This can lead to higher maintenance cost or entire unit replacement before its normal end of life. SpeediDuct® protects and contributes to extend the life of the equipment.

Exposed linesets with damaged insulation have reduced efficiency. This may cause the system to use higher levels of energy and cost more to operate. SpeediDuct® protects the lineset insulation and saves energy.

- Size up to 150 mm
- Paintable
- UV-resistant
- Spinfix rail

Technical data

Made of rigid, shockproof, UV-stabilized fire resistant PVC
High-quality performance, usable from -20°C / -4°F to +60°C / 140°F in a static position

Product features and benefits

1 man job	Use the SpinFix-clip to keep ducts contentsstrapped while installing the cover. Easy and Fast!
Asymmetrical : Easy when installed in corners	Ducts 70 and 105 have an asymmetrical Design. When installed in corners, the smaller duct top Side is easy to clip onto the base channel.
Up to 150mm wide	Duct size 150 is the widest of its kind, ideal for multi-split or heat pump installations. It has 2 SpinFix rails : 1 in the top and 1 in the base channel
Rigid installation	Top-Bottom fittings assembled with stainless steel screws ensure a rigid installation

SpeediDuct®

SpeediDuct®

Made of rigid, shockproof, UV-stabilized fire resistant PVC

High-quality (usable from -20°C / -4°F to +60°C / 140°F in a static position)

Thanks to the inside fixation rail, the SpinFix allows you to use cable ties to strap and keep the linesets in place, contributing to the duct rigidity.

SpeediDuct®

OPTIMALDUCT®
THE OPTIMAL WAY TO PROTECT YOUR INSTALLATION

This innovative product brings a host of features and benefits to streamline your installation process and enhance overall efficiency.

The fast and hassle-free installation with a simple click-on mechanism for fittings onto the duct guarantees a more efficient workflow, saying goodbye to timeconsuming setups.

OptimalDuct® comes equipped with the SpinFix-Clip, a technology that turns what used to be a two-person job into a manageable task for a single installer. This ingenious clip keeps duct contents securely strapped during installation, ensuring a smoother process. The SpinFix also contributes to duct rigidity: thanks to the inside fixation rail, cable ties can be used to strap and secure linesets in place, adding an extra layer of stability. By featuring a protective film that can be easily removed from the ducts, OptimalDuct maintains cleanliness and a professional appearance. Different duct sizes are available to cater to your specific installation requirements.

CLIMCLICK®
PREMIUM FITTINGS FOR
OPTIMAL DUCT

Introducing the Climclick® accessory line, designed specifically for seamless compatibility with the OptimalDuct® trunking. Our innovative accessories enhance functionality and efficiency, making installation a breeze while ensuring a sleek and professional finish. Whether you're upgrading your existing setup or starting a new project, Climclick® provides the perfect solution for all your ducting needs.

Wall cover

The base is first securely mounted to the wall to ensure a stable foundation. Once in place, the lid is then attached using a snap-fit mechanism, locking it firmly into position.

ClimCLick ®

CANAL ICE™ &
CANAL DRY™

The CANAL ICE™ and CANAL DRY™ product lines extend the legacy of the CANALSPLIT® range by offering solutions that prioritize simplicity and versatility. Carefully engineered to adapt seamlessly to diverse application needs, these products strike an ideal balance between refined functionality and enduring quality.

CANAL ICE™ features a simplified design, for less demanding installations. Meanwhile, CANAL DRY™ delivers a similarly construction, tailored to address practicality and ease. Together, these additions enhance the CANALSPLIT® family, offering customers a wider spectrum of options for their projects.

ARE YOU INTERESTED? SCAN ME

Despite the simplicity offered by their design and construction, CANAL ICE™ and CANAL DRY™ distinguish themselves as elegant solutions that maintain the trusted reliability synonymous with the CANALSPLIT® brand.

| 65x50 mm | 70x55 mm | 80x60 mm | 90x65 mm | 125X75 mm |

Available sizes - Canal Dry™

Depending on installation configurations, ducts' contents may vary.

| 65x50 mm | 125X75 mm |

Technical data

Made of rigid, shockproof, UV-stabilized fire resistant PVC

High-quality performance, usable from -20°C / -4°F to +60°C / 140°F in a static position

Product features and benefits

Protective Film
Dirty hands while installing? No worries! Just remove the protective film from the ducts.

Wide selection of duct sizes
Choose among the 6 different duct sizes available for your professional installation!

Hide in beautiful view
Attractive design and special inserts that allow you to simplify and speed up installation: these are the keys to the success of the air conditioning conduits designed by Artiplastic.

CANAL DRY   **CANAL ICE** LINESET COVERS

Canal Ice™

This duct has a flat baseline with a slightly rounded snap-on cover; it can be installed close to the corners of the wall or ceiling without affecting closing and reopening.

CANALSPLIT®
ELECTRICAL POWER
MINICHANNEL

To address potential challenges related to electrical power distribution during installation, the Canalsplit® Mini Trunkings system has been precisely engineered and implemented. Made from rigid, self-extinguishing PVC rated V0 per UL 94 standards, it offers excellent flame-retardant properties. The material is also highly resistant to UV radiation, making it ideal for both indoor and outdoor applications, even under prolonged sun exposure, without compromising structural integrity.

Minichannel 18x18

Minitrunking has been realized to solve eventual problem during installation related to electrical power. Rigid self extinguishing PVC material V0. UV rays high resistant.

CANALSPLIT®

CANALSPLIT®
SERVICE DUCTS AND
ACCESSORIES ➤

Canalsplit® 03 and Canalsplit® 04 service ducts are designed to accommodate condensation drain pipes along with additional electrical or control wiring required by the system. They provide an efficient, organized solution for routing multiple components, supporting clean and reliable installations. A full range of dedicated PVC accessories—such as elbows, end caps, and connectors—ensures seamless integration, consistent aesthetics, and a refined finish.

Canal and cover

Canalsplit® is realized to content condensation drain pipes and eventually other wirings. Related PVC accessories complete the range, for a perfect aesthetics finishing.

RODIGAS®
THE BRACKETS
SPECIALIST

Rodigas® brackets are engineered to meet the demands of a rapidly growing market, providing a dependable and visually appealing solution for installing external HVAC units and heat pumps. Built with high-quality materials for exceptional durability, they ensure secure and long-lasting support for the equipment. Our products are designed with a strong focus on both reliability and ease of installation.

Products certifications

Certified products and processes are the best quality assurance we can offer. It is for this reason that we continuously compare ourselves with accredited institutions and professionals who guide us on our journey.

Our Quality Management Team carries out rigorous inspections and testing throughout the production process.

Painting Process

The brackets, mainly made of electro-galvanised steel, are coated with epoxy resin-based paint powder, which adheres by electrostatic effect, and then passed through an oven where, due to the temperature, the paint first melts and then cures, giving an adherent layer that makes our products suitable for outdoor applications with over 480 hours of resistance to salt spray tests.

Product features and benefits

Insurance	Our products are covered by liability insurance for any damages caused by manufacturing defects.
Load capacity	TUV-certified products are able to withstand three times the declared weight
Welding Process	Given the importance of this process in all our production sectors, our team consists of certified licensed welders. By adhering to appropriate certified protocols, we are able to perform welds on pickled steel, stainless steel and aluminium.

Rodigas SRL

EVERY WALL NEEDS AN ALLY

Introducing our new Wally range of outdoor unit brackets – the perfect blend of practicality and quality. While designed with the popular 9000 BTU air conditioning units in mind, these brackets offer a easy and reliable mounting solution for the outdoor appliances. Don't let the straightforward design fool you; we've prioritized durability by using only premium-grade materials. Each bracket is finished with a high-quality, exterior-grade epoxy powder coating in RAL 9002, ensuring excellent resistance to the elements and a clean, long-lasting aesthetic.

Wally Brackets

Universal adjustable brackets made of electro-galvanised sheet metal with epoxy powder finish. Easy installation and centre-to-centre distance calculation. Complete with spirit level, fixing screws, dowels, anti-vibration rubber pads and adjustable rear foot consisting.

Folding brackets TÜV Süd certified

These folding brackets serve as a practical alternative to traditional welded brackets, offering a space-efficient design. They are supplied with all the required components for a seamless and precise installation, ensuring optimal performance and reliability. Additionally, they are TÜV Süd certified, guaranteeing compliance with high safety and quality standards.

FLOOR & GROUND SUPPORTS

With the increasing size of outdoor units in the market, ranging from residential to large-scale industrial systems, the demand for high-performance floor supports with exceptional load-bearing capacity and effective vibration absorption is critical. Our floor support solutions are specifically designed to accommodate these larger units, ensuring superior durability and stability. Manufactured from engineering grade materials, they guarantee optimal performance across a wide range of applications. Furthermore, the installation process is simplified, as mounting the outdoor unit requires no drilling into walls or floors, thus eliminating the risk of water infiltration and avoiding any structural modifications.

RECYCLE

Always the right product

Our floor supports are manufactured from a selection of high-performance materials such as galvanized steel, PVC, nylon, polypropylene, and various combinations of these, to ensure maximum durability and efficiency across a wide range of applications.

Product features and benefits

Load capacity	Our range of floor supports is designed to accommodate all types of outdoor units, from residential models to large-scale industrial systems.
Easy installation	The installation process is streamlined, as the outdoor unit can be mounted without the need for wall or floor drilling, eliminating the risk of water infiltration and avoiding any structural alterations.

Ground support

Ground support systems made from a combination of plastic and metal offer a stable, lightweight, and adjustable solution for HVAC and technical installations. Their innovative design features wide support bases for optimal weight distribution and secure positioning, ensuring reliable performance and easy installation on uneven surfaces. Engineered for durability and efficiency, they provide a professional-grade solution for demanding applications.

Frame foot™ 4

Base module of the Frame Foot modular system, featuring four heavy-duty plastic feet with integrated anti-vibration rubber mat and galvanized steel uprights. Height-adjustable and designed for high load capacity, it's ideal for industrial rooftop installations requiring stability and vibration control.

Model	FF4	Color	
Europe code	1503-1100-04		Steel
Factory code	0502.00027.004		
Dimensions	1000 x 1200		
Height (mm)	295 - 415		
Load (Kg)	500		
Foot dimensions (mm)	300 x 300		
Box and Pallet	1		

Frame foot™ 6

Featuring six heavy-duty plastic feet with integrated anti-vibration rubber mats and galvanized steel beams, the Frame Foot modular system is height-adjustable and designed for high load capacity. It is ideal for installing multiple outdoor units in industrial rooftop applications, ensuring stability and effective vibration control.

Model	FF8	Color

DIVERSITECH®

SUMO®
RECYCLED RUBBER
SUPPORTS

Recycling discarded tyres is very important for the environment. By recycling them, we can recover up to 95% of the rubber they were originally made from. This gives us the opportunity to create a new raw material that can be used in urban planning and industry. Niccons commitment to reducing its environmental footprint is evident in the recycled rubber used in the manufacture of the wide range of SUMO anti-vibration supports. This has a positive impact on reducing the use of raw materials, which is essential in extending their life cycle. In addition, the End use eco-glue used in the production process encourages further recycling of the product in the future, promoting a circular and sustainable economy.

Technical data

Made of black SBR recycled rubber, guarantees high vibration damping performance.
Aluminium rail with M10 fixings for external unit.

Product features and benefits

Vibration damping	The high density SBR rubber guarantees high performance in vibration absorption.
Load capacity	Thanks to its solid design, it provides excellent load-bearing capacity.
Wide selection of sizes	Select from a range of lengths to ensure compatibility with all external unit models.
Fast and easy installation	Drilling is not required for installation, making it the ideal solution for flat roof.

CONDENSATE MANAGEMENT

Condensate management is a crucial aspect of maintaining HVAC systems. Proper handling of condensate prevents water damage, protects equipment, and ensures optimal system performance. Without effective management, excessive moisture can lead to corrosion, mold growth, and increased maintenance costs.

Innovative condensate management solutions provide reliable performance while requiring minimal effort for installation and maintenance. These systems are designed to efficiently collect, transport, and dispose of condensate, ensuring the safe operation of HVAC units in various environments.

Key features like durable components, compact designs, and ease of integration make these solutions an essential part of HVAC installations.

Technical data

Made of rigid, shockproof, UV-stabilized fire resistant PVC
High-quality performance, usable from -20°C / -4°F to +60°C / 140°F in a static position

Acquaring®

The innovative Acquaring® line of fittings has been specifically engineered to provide maximum ease of installation and long-lasting hydraulic sealing performance. Each component is equipped with integrated O-rings, which eliminate the need for additional sealing materials and significantly reduce installation time and the risk of leakage. This advanced design ensures consistent, reliable connections even under demanding operating conditions, making Acquaring® the ideal solution for condensate drain management.

Rigid premium gasket connections

Rigid Premium Glue Connections is a high-quality range of accessories for rigid PVC condensate drain pipes. Used with dedicated PVC adhesive, it ensures a strong, durable, and weather-resistant bond. Precision-engineered for a perfect fit, it's ideal for professional installations where reliability and performance matter.

DIVERSITECH®

RedBox 2 litres condensate pump

The DiversiTech RedBox 2 Litre Tank Pump is a condensate tank pump with a flow rate of 280 LPH and a lift of 5.1 metres. This pump has metal mounting tabs which allows the tank to be screwed to the wall. The universal power lead makes the pump easy to install, service and retrofit. The unique LED indicators highlight when the pump has power, is running and when the high level alarm has been activated.

DIVERSITECH®

PLUMBING & FIXING

Within these pages, you will discover a curated range of high-quality products designed to meet the demanding needs of modern building systems. While we proudly feature a diverse array of solutions, this introduction specifically highlights the exceptional offerings from Gia for the plumbing sector. Gia's commitment to innovation and reliability ensures that professionals can depend on their components for robust and efficient installations.

Furthermore, we recognize the critical role of secure and dependable connections in air conditioning systems. To that end, we also showcase the Rapid-O™ line of brass fittings, specifically engineered for coated copper tubes used in air conditioning installations. Rapid-O™ fittings provide a swift and reliable connection solution, ensuring the integrity and longevity of your HVAC systems.

Explore the following sections to find the specific Gia plumbing products and Rapid-O™ fittings that best suit your project requirements. We are confident that our selection will provide you with the quality and performance you expect.

Flip system

FLIP SYSTEM is one of the masterpieces of GIA's production, a patented fixing system that is made up of fast locking pipe clamps that are suitable for any kind of pipe lines.When compared to traditional pipe clamps, Flip ones prove to significantly reduce noise spread in the drainage system while liquids flow.

What also makes the difference in these pipe clamps is their locking system as it makes installation extremely quick and easy. FLIP pipe clamps are indeed designed in order to be closed simply by fingers pressure, with no tools needed.

After installation - if necessary - the pipe clamp can even be opened again and removed, or adjusted once more. To do so the installer can use the specific "Apriflip" extracting tool to easily open the pipe clamp. It takes two simple moves: insert the pins in the two holes set at the sides of the upper part of the pipe clamp, then pull it out.

Otherwise - using the same extracting tecnique - FLIP can be opened by using two cross screwdrivers with a 3 mm diameter.

Rapid-o

Rapid-O™ offers a full range of high-quality fittings, the fastest and easiest way to connect copper refrigeration pipes. They are not only fast and easy to use, but also reusable and durable. Thanks to our unique fittings you'll get the job done up to 90 % faster than other methods, which makes better and faster than the traditional ways of connecting copper pipes.

PLUMBING & FIXING

COMPLEMENTARY PRODUCTS

When it comes to HVAC systems, every detail matters. Beyond core components, it's the small yet critical accessories that ensure peak performance and lasting reliability.
Our range of high-quality complementary products is designed to enhance functionality, improve efficiency, and extend the lifespan of your HVAC installations.
Crafted with precision and quality, they are indispensable for achieving greater efficiency and prolonged operational excellence in HVAC systems.

Air deflectors

Advantages:

Quick and easy installation.

Screw (enclosed) hidden after installation (only for 5001 DF and 5002 DF).

Anti-condensation insolation slab enclosed (only for 5001 DF and 5002 DF).

Remove unpleasant air flow.

Easybend®

Air conditioning lineset bender

No more kinks or leaks when bending your linesets

The tool that you need to bend linesets when installing split systems

Easiest way to bend dual tubes without damaging their insulation

Reusable after cleaning!

No need for springs or heavy equipment!

Only for linesets made from soft copper

DIVERSITECH®

F1RST

BUILDING OUR FOUNDATION FOR EXCELLENCE

At DiversiTech, success is more than just reaching a goal – it's the way we work. It's our values, our people, and our commitment to doing things the right way.

That's why we created **F1RST**: to bring together the core principles that guide everything we do and ensure we deliver value you can count on.

DiversiTech ®

FOCUS

We believe in precision and getting things right the first time.
By staying focused, we ensure smooth processes, reliable results, and services that consistently meet your expectations.

INTEGRITY

We do what's right, every time. Our commitment to honesty and transparency means you can trust DiversiTech to always act in your best interest.

RESULTS

Your goals are our priority. We're driven to deliver impactful outcomes that meet your needs and exceed expectations, ensuring you always get results you can see and value.

SAFETY

We protect what matters most to you, from people to processes to data. Our focus on safety ensures peace of mind at every stage of our collaboration.

TEAMWORK

Collaboration is at the heart of everything we do. By combining our expertise with your vision, we create smarter, tailored solutions that work for you.

Hereinafter the terms "we", "our", "ourselves", "us" refer to DiversiTech® Corporation and Affiliates or sister companies.

The products mentioned in this document are meant to be purchased, installed, periodically checked and maintained only by professionals specialised in Heating, in Ventilation, in Air-Conditioning or in Refrigeration (HVAC-R) that are supposed to have sufficient professional know-how to select the right product according to their intended use and their installation. Any product disposal is at the sole and entire responsibility and expense of the installer and should be done in respect with all regulations in application at the installation site. We advise our customers to check whether the products they choose are appropriate for their intended use as their application, use, execution, installation and maintenance are carried out of our control.

Those who in any way handle our products are sole responsible for determining (a) the suitability of the products for their intended use, (b) the appropriate manner of processing and maintaining the product to ensure safety and quality and (c) chemical, physical and health effects related to those activities, (d) to inform themselves in order to be able to decide if specific data are necessary prior to their installation in respect to climatic and environment conditions, norms and regulations in application at the locations of storage and installation, (e) to control if the supporting structure on which the product(s) will be installed is resistant enough for the intended use, (f) to use appropriate tools and fixing materials for the installation and for the maintenance. Customers, installers and third parties are sole responsible for damages or failures in performance resulting from misuse, abuse, neglect or improper handling, transporting or storage. Until installed our products must remain in their original packaging, sheltered from climatic conditions. Our warranty is exclusively limited to the supply of a product of constant quality according to our standards. If our product liability is confirmed, the limited warranty will only be such as, at our sole discretion, to make available equivalent or similar replacement goods in conformity to our standards of quality to replace the goods considered faulty.

Notwithstanding the care we take to conceive and to manufacture our products, a little difference in the color can be noticed between batches of different production runs. This is inherent to our production processes and technological limits of our equipment. When mentioned, dimensions are rounded off and are not meant for manufacturing purposes. Tolerances apply. Unless specifically mentioned in the document, all data, whenever a notion of safety factor or safety parameter to be taken into account may implied or requested, is expressed without. Technical datasheets are available on written request. We reserve us the right to modify all data contained in this document without prior notice. We recommend you contact us before quoting your customers. The information in this document has been carefully checked and is believed to be accurate. However no responsibility is assumed nor for translating nor typographical nor for proofreading errors neither omissions. Due to the evolution of standards, materials, equipment or other reasons, the characteristics indicated by text or representations or illustrations or drawings and depicted products in this document are not binding for us until our services have specifically confirmed them.

Unless otherwise specified, in all our communications, pricelists, quotations, order confirmations and other commercial documents, all our prices are always expressed without taxes. Purchasing from DiversiTech® Corporation or its Affiliates is submitted to its General Conditions of Sale.

All pictures and drawings in this literature are for illustration purposes only. Data may change without prior notice and are subject to tolerances. DiversiTech® Corporation, its Affilates and its Distributors cannot be held liable for typographical errors, layout errors or technical misinformation contained herein. This catalogue cancels and replaces all former versions. It is the sole responsibility of the customers to request to obtain the most recent version in force of this catalogue.
